AUTOMATION ANYWHERE | AUTODESK

Discover comprehensive Microsoft training that covers Azure Cloud, AI, security, and business applications. Our courses empower you with skills in data management, automation, modern workplace solutions, and more, helping you stay ahead in a rapidly evolving digital landscape.

Azure Infrastructure	Azure Data & Artificial Intelligence	Digital Apps & Innovation
Modern Work	Business Applications	Security

Discover Google Cloud training in Cybersecurity, Machine Learning, Generative AI, and DevOps. Build skills in networking, hybrid cloud, Google Workspace, and data management, including BI and data warehousing, to stay ahead in the digital world.

Cybersecurity	Machine Learning	Generative AI
DevOps	Networking	Security
Hybrid and Multi-cloud	Google Workspace	Database
BI and Analytics	Data Warehouse	

Unlock the full potential of AWS with Spectrum Networks' expert-led training. From cloud architecture to data management, security, and automation, our courses empower teams to harness AWS tools and services, driving innovation and optimizing investments

Generative AI	Machine Learning	Data Analytics	Security
Databases	Advanced Networking	Serverless	Storage

AUTOMATION ANYWHERE | AUTODESK

Get access to our entire range of Juniper training covering Automation and DevOps, Cloud, Data Center, and Design. Gain expertise in Enterprise Routing and Switching, Mist AI, Security, and Service Provider Routing and Switching, keeping you at the forefront of networking and IT solutions.

Juniper Cloud Solutions	Data Center	Design	Enterprise Routing and Switching
Mist AI	Security	Automation and DevOps	Service Provider Routing and Switching

Get your team Citrix ready with our training that covers Cloud, Networking, and App Delivery and Security and Desktop as a Service (DaaS), Secure Access, Endpoint Management, and Workspace Solutions, and more.

Virtualization	Networking	App Delivery and Security
Citrix Cloud Solutions	Desktop as a Service (DaaS)	Endpoint Management
Secure Access	Collaboration and Workspace Solutions	

Our Red Hat training equips organizations with skills in Linux Platforms and Cloud Computing, optimizing IT environments to help streamline processes and enhance performance.

Linux Platforms	Cloud Computing	Application Services
Automation and Management	Data Services	Application Development

Equip your team with our Nutanix training, covering AHV Virtualization, AOS Storage, End-User Computing, and Intelligent Operations. Gain expertise in Nutanix Cloud Clusters (NC2), Cloud Infrastructure, Database Service, VDI, and more—keeping you ahead in cloud and data center solutions.

AHV Virtualization	AOS Storage	End-User Computing	Intelligent Operations	NC2 (Nutanix Cloud Clusters)	Nutanix Cloud Infrastructure
Nutanix Cloud Manager	Nutanix Database Service	Nutanix Unified Storage	Objects Storage	VDI	Volumes Block Storage

Choose from a great range of our Fortinet training which covers Network Security, Zero Trust Access, Security Operations, and Cloud Security. Gain expertise in Operational Technology security, ensuring you stay at the forefront of cybersecurity in an evolving digital landscape.

Network Security

Zero Trust Access

Security Operations

Cloud Security

Operational Technology

Explore networking security skills covering Pulse Connect Secure, Pulse Policy Secure, and Virtual Application Delivery Controller (VADC). These courses provide the essential and advanced knowledge needed to optimize secure access and application delivery in today's digital landscape.

Secure Remote Access (Pulse Secure)

Network Access Control (Pulse Secure)

Virtual Application Delivery Controller (Pulse Secure)

Our KnowBe4 training helps organizations with Social Engineering Prevention and Risk Management, enabling employees to mitigate threats. Courses on Cybersecurity Best Practices and Data Protection ensure compliance and safeguard sensitive information.

Social Engineering Prevention

Risk Management

Cybersecurity Best Practices

Data Protection and Privacy

Enhance your team's cybersecurity skills with our Palo Alto training, covering Cloud Security, Network Security, SASE, and Threat Detection. Our courses provide the fundamentals and advanced knowledge needed to tackle modern security challenges.

Cloud Security

Network Security

Security Operations

Secure Access Service Edge (SASE)

AI and Machine Learning Integration

Arcitura | CompTIA

PeopleCert | DASA | EXIN

## Arcitura<sup>®</sup>

the IT education company

Transform your organization with our Arcitura training, covering Technology Architecture, Artificial Intelligence (AI), and Big Data. Our courses in Data Science, Cloud Computing, Digital Transformation, Microservices & SOA, and IT Security equip your team to drive innovation and ensure successful project delivery.

Technology Architecture

Artificial Intelligence (AI)

Big Data

Data Science

Cloud Computing

Core Skills

Arcitura | CompTIA

PeopleCert | DASA | EXIN

## PeopleCert

All talents, certified.

Elevate your team's skills with our PeopleCert training, covering IT Service Management, Project Management, Agile and Lean, and DevOps—empowering your organization to achieve operational excellence and effective project delivery.

IT Service Management

Project Management

Agile and Lean

DevOps

## DASA

Boost your team's capabilities with our DASA training, covering DevOps Foundation, DevOps Professional, and DevOps Leadership—equipping your organization with the skills to excel in DevOps practices and lead successful digital transformations.

DevOps Foundation

DevOps Professional

DevOps Leadership

## EXIN

Empower your organization with our EXIN training, covering Agile, DevOps & Lean, Business and Service Management, Data Protection & Security, and Technologies & Software—helping your team master key skills for today's dynamic IT landscape.

Agile

DevOps & Lean

Business and Service Management

Data Protection & Security

Technologies & Software

## Group One Courses

Stay ahead in the industry with these Trending Courses, designed to equip your team with the latest skills and knowledge to thrive in today's **dynamic tech landscape**.

Edge Computing

Augmented Reality (AR)

Virtual Reality (VR)

Cloud-Native Technologies

Quantum Computing

5G Technology

## Group Two Courses

Enhance your team's expertise with our courses focusing on **cutting-edge technologies** like Blockchain, IoT, Data Science, Cybersecurity Innovations, and Ethical Hacking—preparing your organization for the future of tech.

Blockchain and Distributed Ledger Technology

Internet of Things (IoT)

Data Science and Big Data Analytics

Cybersecurity Innovations

Ethical Hacking and Penetration Testing

## Group Three Courses

Prepare your team for the future with our Trending Courses, covering in-demand skills like Serverless Computing, RPA, API Development, DevOps, Data Science, and Advanced AI & ML—equipping your organization for success in the evolving tech job market.

Serverless Computing	Robotic Process Automation (RPA)
API Development and Management	DevOps
Data Science and Big Data Analytics	Advanced AI and ML
